ABOUT US

Commercial vehicle superstructure manufacturing is Yenkar Torunlar Company Union's main focus since 1977. Mixing the mastery in craftsmanship of co-workers, we work together more than 20 years, with young and dynamic engineers' vision, innovation has been our priority ever since. Our target is to increase the added-value in our production and serve our customers with the highest quality materials and products. Fast and effective post sales services to maintain customer happiness is the most important thing in our policy.

QUALITY IN PRODUCTION

Climate conditions, Land transportation conditions, government supervisions are considered before building any product. Vehicle manufacturer company's directives are the most important elements for building a commercial vehicle superstructure.

For each production step we set our quality policies based on the quality management systems in international sectoral standards.

MAXIMUM VOLUME & MINIMUM WEIGHT

Lightweight Aluminum Curtainside Superstructure

Lightweight Aluminum Curtain superstructures benefits you with the maximum load capacity because of its minimum weight.

Modifiable with customer's choice, it's 400kgs.

Suitable with European Standards and clearance services.

All truck equipments and accessories are mountable on the products.

Superstructures that built on vehicle chassis are fully bolt mounted and they are modular.

MODULAR

Special Design
Aluminum profiles are
installed with bolts.

Front wall, back wall,
side walls and the roof
are totally optional in
customer preference.

For the customers who
would like to do the
installation themselves,
our product can be sent
to their location.

LOADMASTER
